## ABOUT US

'Risus Parasails' company was established in 2007. The company is producing parasails, harnesses, triplizer and lifejackets. Risus and its professional and educated staff give a lot of importance to customers 'satisfaction by providing of qualified services. Intended models are manufactured by experienced designers. Our customers may check our web site [www.risusparasails.com](http://www.risusparasails.com) for more information about current models and innovations. Our company gives a lot of importance about lightweight and strength of selected textiles to satisfy our customers. More light weighted precedents prefer. The thickness of the textile is 1.3 x 1m2 and 56 gr2. One of the most important characteristics of the textile is that it is 6.6 nylon rips top. Double sides of the textile are covered by silicon with soft elastics feature and at the same time our company is using Teflon covering under the silicon to provide the longevity of material. The textile of Risus has characteristics of Nano technics therefor in case of laceration of the parasails textile; this type of textile will prevent progression of laceration. In the planting of parasails we are using reinforcement-tape with 6.6 ropes and the strength was tested. The Risus textile is salt water and UV resistant.

## ABOUT PARASAIL

'The Parasails are producing in very high quality and wide technological system by professional staff. Our staff provides the control tests of the parasails at the each stage of production before deliver to our customers. The equipment of parasails and raw materials for production are all imported. Risus produces 2 types of parasails as 16 paneled so 20 paneled. In production of 16 paneled parasail we use 3 types of YKK zippers in measures of 1,30cm -1,50cm- 2,20cm. To make 20 paneled parasails smaller as FT we use 4 pieces at left and 4 pieces at right sides totally 8 pieces YKK clips. At the opening of these clips 32 FT reduce to 30 FT, thus each FT parasail reduces for 2 FT. The textiles used for production of both types of parasails are same. Risus presents 13 different FTs and 14 various colors. Risus presents the chance to fly on the sky by the self-designed models parasails to our customers by their own choices. Its pleasure for us to produce different models by our customers' individual orders to your own company logotypes, writings by the parasails textiles. In our designs we don't use any prints.

## 'BETON BAYRAM', FIRST GETS THE GIRLS AND THEN RUN TO THE RECORD WITH PARASAIL!

Turkish parasails company RISUS PARASAILS with its methodological name of the joy and laughter 'RISUS' flies the 210 kilos of 'Betony' Bayram to the high of 200 meters and became the first parasails company in the World. Bayram is the first person who has opened skies with parasail of the foreign production and who has a danger of death. Nevertheless he has opened the parasail of the RISUS PARASAILS Company with a model of Turkish flag on the high of 200 meters. Bayram KILIC is 210 kilos man, he is known as bodyguard of the famous people with nick name 'BETONY' BAYRAM. With the parasail of RISUS company in form of Turkish flag Bayram has done a first step in the world... Bayram had tried to fly with foreign made parasails and he had danger of death, but at this time he decided to fly with RISUS PARASAILS' parasail made in Turkey and he enjoyed the flight!

## 210 KILOS OF BETON BAYRAM FLEW AS BIRD

'The Turkish guy like me could be flew only by Turkish company. It was very special feeling. I feel proud to have such opportunity to fly at such highness with Turkish Flag. I want to thank RISUS PARASAILS Company for giving me chance to feel like that', said Bayram who was flying like bird with a parasail designed as Turkish flag made by the Turkish parasails company RISUS PARASAILS which started the production of parasails this year.

'Betony' Bayram expresses his feelings about Risus Parasails, which strength and carrying capacity are also determined before a notary public, by saying that "I've felt no fear at all despite I've recovered the death risk before. Quite to the contrary - I've been affected. I did not beware to trust myself to a Turkish company. When you speak of safety, the first name coming to mind in Turkey is mine. But even I trusted my safety to them. And anyway, if it let fly even me, its safety is indisputable. I've examined it; the notary public has confirmed it. If Turkish people really want something, they can do the best of everything. We are a nationality who can let fly not only a "Concrete" Bayram, but apartments of concrete too."

'Betony' Bayram, taking a vacation at Side with his 9 years old daughter Sanem, says that "Flying is a beautiful feeling. I recommend it to everybody. It seems like the whole world is under your feet... My obstinacy and insistence on doing this is just to prove that the overweight people like me can also go in for extreme sports."

## PROPERTY

**Model : 24 Dwarf Planet**

**FT (Q) : 24 (FT)**

**Aplication : One - Two Seat ( max 33 kph )**

**Max Weight : 98 KG**

**Max IBS : 216 IBS**

**( M<sup>2</sup> ) : 45**

## PROPERTY

**Model : 26 Orbit**

**FT (Q) : 26 (FT)**

**Aplication : One - Two Seat ( max 32 kph )**

**Max Weight : 120 KG**

**Max IBS : 264 IBS**

**( M<sup>2</sup> ) :48**

## PROPERTY

**Model : 28 Asteroid**

**FT (Q) : 28 (FT)**

**Aplication : One - Two Seat ( max 31 kph )**

**Max Weight : 140 KG**

**Max IBS : 308 IBS**

**( M<sup>2</sup> ) :52**

### PROPERTY

**Model : RP30 Neptun**

**FT (Q) : 30 (FT)**

**Aplication : One - Two Seat ( max 30 kph )**

**Max Weight : 160 KG**

**Max IBS : 352 IBS**

**( M<sup>2</sup> ) :57**

## PROPERTY

**Model : RP32 Saturn**

**FT (Q) : 32 (FT)**

**Application : One - Two Seat ( max 29 kph )**

**Max Weight : 180 KG**

**Max IBS : 396 IBS**

**( M<sup>2</sup> ) : 61**

## PROPERTY

Model : RP34 Galaxy

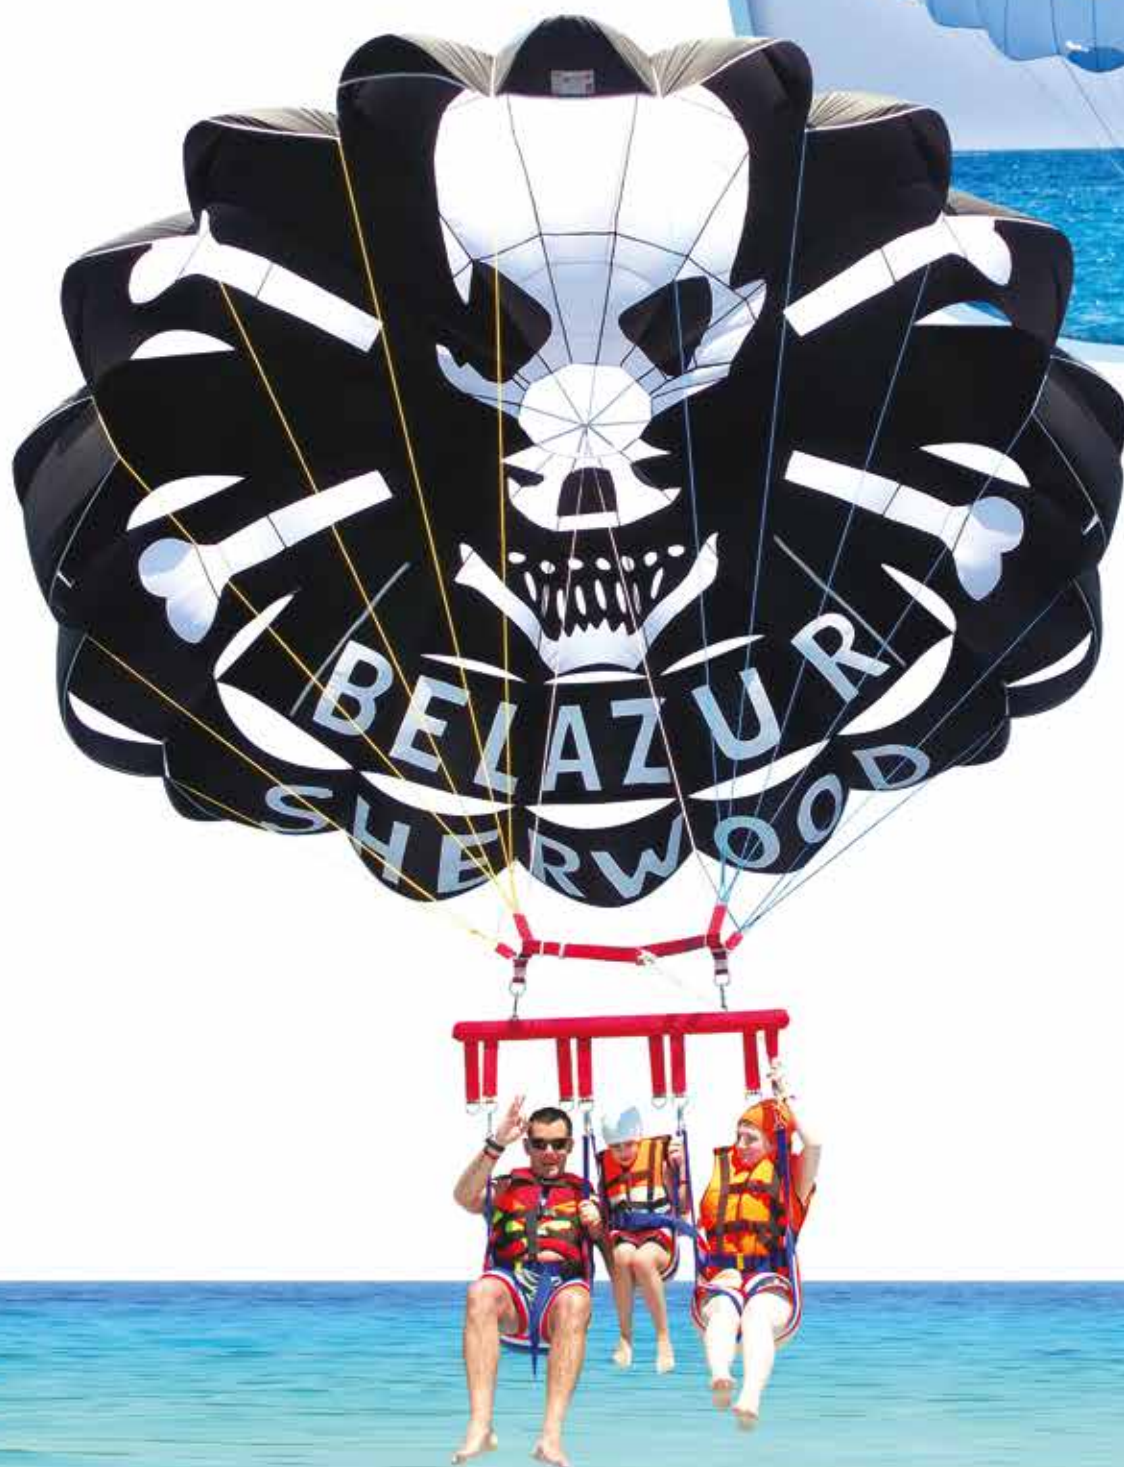

FT (Q) : 34 (FT)

Aplication : One - Two Seat ( max 28 kph )

Max Weight : 210 KG

Max IBS : 462 IBS

( M<sup>2</sup> ) :69

## PROPERTY

**Model : RP36 Venus**

**FT (Q) : 36 (FT)**

**Application : Two - Three Seat (max 27kph)**

**Max Weight : 230 KG**

**Max IBS : 507 IBS**

**( M<sup>2</sup> ) : 79**

### PROPERTY

**Model : RP38 Space Shuttle**

**FT (Q) :38 (FT)**

**Aplication :Two - Three Seat (max 23 kph)**

**Max Weight : 250 KG**

**Max IBS : 551 IBS**

**( M<sup>2</sup> ) :90**

## PROPERTY

**Model : RP39 Jupiter**

**FT (Q) : 39 (FT)**

**Aplication : Three- Four - Seat (max 22 kph)**

**Max Weight : 260 KG**

**Max IBS : 573 IBS**

**( M<sup>2</sup> ) : 103**

### PROPERTY

**Model : RP40 Sun**

**FT (Q) : 40(FT)**

**Application : Three- Four - Seat (max 21 kph)**

**Max Weight : 265 KG**

**Max IBS : 573 IBS**

**( M<sup>2</sup> ) : 109**

## PROPERTY

**Model : RP42 Earth**

**FT (Q) :42(FT)**

**Aplication :Three- Four Seat (max 19 kph)**

**Max Weight : 275 KG**

**Max IBS : 606 IBS**

**( M<sup>2</sup> ) :114**

### PROPERTY

**Model : RP44 Mars**

**FT (Q) : 44(FT)**

**Application : Three- Five Seat (max 15 kph)**

**Max Weight : 300 KG**

**Max IBS : 661 IBS**

**( M<sup>2</sup> ) : 130**

## PROPERTY

**Model : RP46 Moon**

**FT (Q) :46(FT)**

**Aplication :Three- Five - Seat (max 12 kph)**

**Max Weight : 325 KG**

**Max IBS : 716 IBS**

**( M<sup>2</sup> ) :143**

## PROPERTY

Model : RP48 Space

FT (Q) :48(FT)

Aplication :Three- Five - Seat (max 10 kph)

Max Weight : 345 KG

Max IBS : 760 IBS

( M<sup>2</sup> ) :154

## Doublizer

Risus Doublizer is flown with two persons. It is even possible to have a conversation. The metal section in the Doublizer is made of aluminium that is coated with polycarbonate. A cloth covers the casing, you never see the aluminium on a Risus tandem stick. It is designed to avoid harm to a persons head or touching any areas of the body in the course of flight.

## **Triplizer**

Risus Triplizer is flown with three persons. The metal section within Triplizer is made of aluminium that is coated with polycarbonate. A covering cloth covers casing, you never see aluminium on Risus tandem stick. It is designed to avoid harm to a persons head or touching any areas of the body in the course of flight. You can make enjoy flight with your family and love.

## RISUS TRIPLİZER

The Parasails are producing in very high quality and wide technological system by professional staff. Our staff provides the control tests of the parasails at the each stage of production before deliver to our customers. The equipment of parasails and raw materials for production are all imported. Risus produces 2 types of parasails as 16 paneled so 20 paneled. In production of 16 paneled parasail we use 3 types of YKK zippers in measures of 1,30cm -1,50cm- 2,20cm. To make 20 paneled parasails smaller as FT we use 4 pieces at left and 4 pieces at right sides totally 8 pieces YKK clips. At the opening of these clips 32 FT reduce to 30 FT, thus each FT parasail reduces for 2 FT.

## HARNESS

The textiles used for production of both types of parasails are same. Risus presents 13 different FTs and 14 various colors. Risus presents the chance to fly on the sky by the self-designed models parasails to our customers by their own choices. Its pleasure for us to produce different models by our customers' individual orders to your own company logotypes, writings by the parasails textiles. In our designs we don't use any prints.
